

I have a passion for media related production. I seek to surround myself with intelligent and talented people who have similar aspirations.

Currently, I am most interested in improving my production operation skill sets in lighting and photography.

FILMMAKER : WRITER – DIRECTOR – PRODUCER

I've been a filmmaker since the age of 16, with 21 years of experience. I have worked on multiple features and shorts, as well as commercials and promos. I can create high budget productions from a blank sheet of paper, guiding it through each phase of production to delivery.

I have extensive experience with creating original content, writing scripts, department breakdowns, scheduling, budgeting, documentation, fundraising, facilitation, recruiting, auditioning, management, organizing, set operations, directing, visual effects, sound design, editing, deliverables, and marketing.

DESIGNER : WEB – GRAPHIC - PRODUCTION

Design and media are closely related areas of production where my skills have bled over into both, benefiting and supporting my career. My experience working for marketing firms and clients is just as extensive as my work as a filmmaker.

My design experience includes digital and physical work. Web, front-end & UX design, product, screen printing / apparel, marketing materials, costumes, film sets, events and attractions. I built, and utilize, an online production system for film production that organizes and manages production material, forms, and documents to keep communication between producers and crew in sync in real time.
